Education

| 2022 – 2026 | **B.Tech/Artificial Intelligence And Machine Learning** |
| Karur, India | *M.Kumarasamy College of Engineering* |

Profile

Enthusiastic and eager-to-learn web developer with a solid foundation in HTML, CSS, JavaScript, and React. Passionate about creating clean, responsive, and user-friendly web applications. Strong problem-solving abilities, quick to adapt to new technologies, and able to work well both independently and in a team. Excellent communicator with a keen attention to detail, focused on delivering quality solutions while learning and growing in the field.

Projects

| 2025 | **Cloud-Based Hospital Booking System with Chatbot** |
| | *This project is a cloud-integrated hospital appointment booking system that allows patients to schedule consultations online. It features a smart chatbot that assists users with booking, queries, and real-time updates. The system ensures seamless data access and management via cloud storage, making it efficient for both patients and healthcare providers.* |

| 2025 | **Smart Scanner using Web Scraping** |
| | Smart Scanner is a web-based AI tool that scans product names or images and fetches real time prices from multiple e-commerce platforms using web scraping. The system helps users compare prices instantly and make smarter shopping decisions. Built with simple frontend tech and backend scraping scripts, it empowers anyone to create their own price comparison tool. |

| 2024 | **Stock Prediction System using AI** |
| | *This project is an AI-powered stock prediction system that analyzes historical stock data and market trends to forecast future prices. It uses machine learning models and real-time APIs to provide accurate and dynamic predictions. Designed for investors and learners, the system offers insights and charts through a simple web interface* |
